Experts in Valve Testing,
Maintenance and Repair

Trusted OEM of Valves
and Spare Parts

Industry-Leading
Valve Testing Technology

CRANE®

NUCLEAR

Valve & Valve Parts

Crane Nuclear's Valves and Valve Parts business segment is an industry trusted OEM of valves and spare parts with over 50 years of experience in the nuclear industry. Our reputation comes from our consistent high-quality products that have proven to perform reliably in the most severe environments.

Industry Training

Crane Nuclear provides nuclear valve training courses to facilitate personnel proficiency and maximize operations of these highly regulated facilities. Our nuclear services and training courses have helped to streamline valve maintenance and testing practices, extended the life of existing equipment, and maximized efficiency in every U.S. nuclear power plant thathas used our services.

Crane Nuclear provides Air Operated, Motor Operated, Check Valves, Valve Maintenance and Actuator Maintenance training.

Flow Experties

Crane has remained committed to application expertise since its early days. One such example was demonstrated in early 1940s by its introduction of the Crane Technical Handbook TP410 - long since and still today recognized as the leading guide to principles aiding in the design of fluid-handling systems. This guide has recently been updated and the company has developed a companion website www.TP410.com that offers real-time online calculation capabilities to solve necessary fluid handling equations.

Nuclear Services

Crane Nuclear's Valve Services business is the leader for comprehensive valve outage services. Our proven success is grounded in a scope-based and process driven approach in partnership with our customer. We engage directly with our customers during the planning phase of an outage, enabling alignment and a sound execution every time. We provide the nuclear industry with the best possible valve services focused on Safety, Quality, Delivery and Cost.

Scope-Based Process- Driven

Pre Outage Planning → Outage Service → Post Outage Review and Feedback

Testing Product

Crane Nuclear's Testing Products business segment is the pioneer and industry leader for Valve Diagnostic Testing Systems and Sensors. We understand that regulatory requirements and demanding work environments drive a need for accurate and effective valve test equipment. That is why we provide the industry with diagnostic capabilities that are second to none.
